The screenshot shows the PubMed interface for the article "Diabetes Mellitus and lower genital tract tears after vaginal birth: A cohort study" by Strand-Holm KM et al. (2018). The article is from the journal Midwifery. The abstract is visible, detailing the study's introduction, methods, results, and conclusions. On the right side, there are sections for "Full text links" (with a red box highlighting the "XUNTA DE GALICIA CONSELLERÍA DE SANIDADE" link), "Save items", "Similar articles", and "Recent Activity". The "Recent Activity" section shows a search for "cesarean section (59470)".

The screenshot shows the website of the Xunta de Galicia, Concellería de Sanidade. It displays the title and source of the article: "Diabetes Mellitus and lower genital tract tears after vaginal birth: A cohort study" from Midwifery [0266-6138] Strand Holm, Karen Año:2018 vol.:69 pág.:121 -127. Under the heading "Texto completo", it states "Texto completo no disponible". Under "Búsqueda web", it offers options to search on CiteULike and Google Scholar. Under "Préstamo Interbibliotecario", there is a highlighted link: "Solicitar documento vía Formulario de solicitud de documentos". Under "Servicio web", it lists various services like consulting the BICO catalog, auto-archiving policies, and copyright information. Under "Citación bibliográfica", it provides the JCR 2017 impact factor (1.787) and a link to the journal on SCImago.
